BUTTER HITTER

Ohk….A game…There are many games available…Now why should I try this game?
What is making this game outstanding?

This game is very lively.. As it has got beautiful butterflies, flying all over the screen and making you feel relaxed.
It helps us in testing our responses and spontaneous actions.

So what happens in the game..?

Here beautiful butterflies appears on the screen.. and you have to touch the butterflies. Butterflies says CATCH ME IF YOU CAN, and we have to catch and increase the score and the level.

Now why did we pick up butterflies?

Butterflies flies.. moves here and there in just fraction of time and so happens in our application also. When our game begins, there are large butterflies on the screen, but after a period of time they keep on shrinking as they move. We are supposed to catch the butterflies so it becomes very difficult if it appears for a little too longer on the screen.

How do we proceed in the game, level-wise?

Game starts on level one and here the higher level is reached by touching 10 beautiful butterflies. They move with greater pace, thus making our game interesting and challenging.

Ohh.. I forgot to tell you about the sound effects?

When I touch a butterfly it makes a bubbling sound.

What has to be taken special care off while playing the game…???You have to be little careful while playing the game….Why??

Here comes the most interesting part of the game, as player receives points for each and every touched butterflies and if the player is unable to touch the butterfly then the score will be deducted by 20 times the score you have achieved in the current level.

How many lives are provided to us..?

Initially, we are given 3 lives. In this game the player gains a new life for each new level that is achieved. So just try it.. play.. and ENJOY..!!
